

EFFECTIVE MEDICAL SOLUTIONS

The Online Global Networking & Business Platform
Connecting Hospitals with Medical Tourism Companies,
Insurance Companies and Employers Worldwide.

iGlobalCare

A Product from e-Medsol

eMedSol's iGlobalCare™ is an integrated networking and business platform which facilitates the interaction between health care providers, health tourists, hospitals, destination managers and insurance companies. It facilitates business expansion, revenue generation and the ability to fully automate your medical tourism processes and interactions with your patients and partners, increasing efficiency, driving down costs and substantially improving relationship interactions.

Who can use the online platform offered by e-MedSol?

- Hospitals
- Referrers
- Patients
- Destination & Travel Management Companies

Key Features of iGlobalCare™

Business Expansion

Online networking between hospitals, referrers and destination managers to create exclusive sub-networks. Integrated marketing and lead management tools.

A Global Solutions Inc (USA) company

Testimonials

As Medical Tourism emerges and patients start traveling from one country to another for medical care in large numbers, it is important to have a common platform where hospitals and medical tourism facilitators can network and create common business protocols. e-Medsol's platform is a timely effort in the right direction to create a common ground for hospitals and facilitators to work together.

Jonathan Edelheit
President
Medical Tourism Association

You have an excellent product to offer. I am very hopeful of this becoming a big success in days to come. I am yet to come across a platform which gives me access to so many players in the same field. Also, I find this platform a very cost effective way to advertise my institution to prospective business partners. The people managing this are hard working and visionary. My wishes and support to you and your team are guaranteed.

Abhik Moitra

We appreciate our alliance with e-Medsol for extending our healthcare services beyond boundaries. e-Medsol provides an effective platform for progressive healthcare institutions to showcase and propagate their internationally benchmarked healthcare delivery to their business associates and partners globally.

Looking at the way how today's healthcare domain has integrated, the communications and business alliances across the globe is the order of the day. In this regard, e-Medsol has very effectively read the pulse and established itself as an effective liaison and intermediary between the service provider and the insurance companies around the world.
